

Symptom Screener: Could you have a bleeding disorder?

Print out, complete, and talk with your doctor.

1. Have you ever felt or been told that you bleed more than most other people, or have you had trouble getting bleeding to stop? Yes No
2. Have you ever felt or been told that you bruise or bleed easily? Yes No
3. Have you had joint swelling or pain for no apparent reason, like in your fingers, elbow, knee, or other joint? Yes No
4. Do you have any family or relatives who bleed easily or have bleeding problems? Yes No I don't know

5. Check all boxes as needed to show if you have ever had:

- Females: Heavier or longer bleeding during periods than most other women or girls, or bleeding complications during pregnancy or childbirth
- Strange or easy bruising or dots on the skin
- Frequent or severe nose bleeds
- Joint swelling and pain, or bruised joints (eg, in hands, knees, elbows)
- Bleeding in your mouth or gums
- Bleeding that lasted longer than most other people after injury, surgery, or dental treatment
- Bleeding in your stomach
- Bleeding in your brain
- As a newborn: Umbilical cord (belly button) or circumcision bleeding that did not stop normally, or brain or stomach bleeding
- Other (explain): _____

**Talk with your doctor if you have symptoms of a bleeding disorder.
Ask your doctor about tests to help find out the cause.**
