

Creating a path for advancement in hemophilia gene therapy research

“As a genetic counselor, I’m passionate about championing the patient’s voice. I believe it is critical that patients have a voice and make informed choices—especially when it comes to research.”

Tessa Field,
Patient Advocacy Lead

Creating a path for advancement in hemophilia gene therapy research

“It’s my mission to deliver the science of gene therapy research as clearly and completely as possible. Patients deserve to understand the potential, challenges, and what questions still need to be answered.”

Laureen Temple,
Senior Patient Education Liaison
